16th Annual Fall Con-Ed

Sponsored by the
Northwest Component

6 hours CEU

Holiday Inn by Ameristar Casino

**2200 River Road
Council Bluffs, IA 51501**

Agenda

7:45 - 8:30 am Check in and on site registration
Continental breakfast

8:30 - 4:00 pm Courses:
It's Time to Seal This Deal &
Talk the Talk: Educating Patients
About Fluoride

11:45 - 12:45 pm Lunch Provided

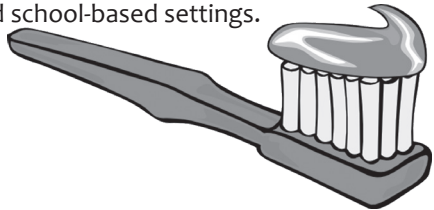

It's Time to Seal This Deal

Dental sealants can reduce the risk of dental caries by up to 75 percent, yet we are falling short when it comes to the Healthy People 2020 goals for sealant placement. This interactive course will cover the evidence-based recommendations for sealant placement including tooth selection, placement technique and material selection. Participants will use interactive polling to test their skills at determining what teeth to seal and answer other questions in rapid fire succession.

How should we identify a caries lesion that can be sealed, i.e. what is the role of the explorer? What is the evidence that sealants are effective when used on a carious lesion? Which sealant materials (resin based or glass ionomer) have the best evidence? This course will help you answer these questions and more. In addition this course will discuss school-based sealant programs and how they can be a cost effective way of treating vulnerable populations.

Learning Objectives:

1. Assess the evidence-based research on sealing sound and noncavitated caries lesions.
2. Discuss the effectiveness of different sealant materials.
3. Review the clinical recommendations for the clinical placement of sealants in clinical practice and school-based settings.

Talk the Talk: Educating Patients About Fluoride

Have you ever had a patient ask you a question that you didn't know how to answer about fluoride? Have you searched for information about fluoride online? Search no further. Learn the evidence and current clinical recommendations for all things fluoride – varnish, silver diamine fluoride, supplements, toothpaste and water. Come learn how to answer fluoride questions from patients in this interactive session. Practice responding to patients the appropriate tools and resources in a safe environment. Learn how to respond when you are asked those tough questions.

Learning Objectives:

1. Understand the current clinical recommendations for various types of fluoride.
2. Understand the importance of framing fluoride in the larger context of prevention.
3. Be able to talk to patients chairside about the science behind fluoride in language that patients and caregivers can understand.
4. Recognize the five most common arguments used by opponents of fluoride and why these claims are inaccurate or misleading.

About Our Speaker

Matt Crespin, MPH, RDH
Associate Director
Children's Health Alliance of
Wisconsin

Matt received his Bachelor of Science Degree in Health Sciences/Dental Hygiene from Marquette University in 2002 and his Community Dental Health Certificate from Northeast Wisconsin Technical College (NWTC) in

2007. Matt received his Masters in Public Health from A.T. Still University in 2010. Prior to his promotion to Associate Director with Children's Health Alliance of Wisconsin in 2011, Matt served as oral health project manager at the Alliance from 2006-2011. Prior to his work at the Alliance, Matt worked in clinical practice for several years in the Milwaukee suburbs.
