

“I chose this program because I enjoy my job in the clinical dental hygiene setting, but I want other options as well.”

“I really am compassionate about helping the underserved and I hope to pursue a career in public health at some point in my future. Before this program, I thought public health interested me but I had never actually observed public health careers in action. This program allowed me to do that which was so helpful.”

“I loved that we had to opportunity to observe in different public health and educational settings. You really don't understand someone's job until you observe a day in their shoes.”

“I choose the program because the online format would offer the flexibility that I need since I work 4 days a week, am raising two young children, and husband travels for work.”

“I love the flexibility.”

“The online discussion boards are great!”

“It's really nice to get different perspectives from other hygienists working in different areas of the state and different areas of practice.”

“It's helping me grow as a hygienist and learn the different needs that face our profession.”
