## Speaker & Sessions

### Thomas Viola RPh, CCP

With over 30 years' experience as a board-certified pharmacist, clinical educator, professional speaker and published author, Tom Viola, R.Ph., C.C.P. has earned his national and international reputation as the go-to specialist for making pharmacology practical and useful for all members of the dental team. As the founder of Pharmacology Declassified, Tom provides valuable insight on the complex interplay between pharmacology and physiology so that clinicians may be knowledgeable about not only the dental considerations of medications used to treat systemic illness but also the systemic considerations of medications used

to provide dental treatment. As an educator, Tom is a member of the faculty of over 10 dental professional degree programs and has received several awards for outstanding teacher of the year. As an author, Tom is well known for his contributions to several professional journals, has served as a contributor, chapter author and peer reviewer for several pharmacology textbooks and currently serves as a consultant to the American Dental Association's Council on Scientific Affairs. As a speaker, Tom has presented over 1000 informative, humorous and engaging continuing education seminars and webinars to dental professionals internationally since 2001. Meeting planners and attendees agree that Tom is their choice to educate within this dental specialty.

## Course Descriptions

### ***I Don't Have Time for this Pain***

Management of acute odontogenic pain is accomplished through a clinical approach that successfully incorporates intraoperative local anesthesia and a postoperative regimen of non-opioid and opioid analgesics. However, improper and inappropriate use of both local anesthetic agents and analgesics have the potential to produce adverse outcomes for our patients. Thus, it is critical for clinicians to accurately evaluate the need for pain control, identify associated risks, and assess the efficacy of the agents to be administered. This program will provide participants with a comprehensive understanding of the pharmacology and therapeutics of local anesthetic agents and analgesics. Special emphasis will be given to effective perioperative pain management and best practices for prescribing analgesics for postoperative pain control.

### ***Something in our Mist***

Although conventional cigarette smoking among young adults has declined markedly over the past several decades, there has been a substantial increase in the use of vaporizing devices. While originally designed as alternative delivery vehicles for nicotine in place of tobacco, advances in technology and lack of strict regulation has given rise to the use of these devices as delivery vehicles for a variety of substances, especially cannabis. Unfortunately, very little information is available about the safety of the active and inactive ingredients present in products used for vaping. This course will provide participants with an overview of cannabis, vaping, and their overall systemic adverse effects. Special emphasis will be given to the oral complications associated with vaping, as well as patient care planning strategies.

# Registration Information

**Registration is Open! Early Bird Special Ends September 20th!**

**Save Time Register Online at [www.iowadha.com](http://www.iowadha.com)**

Online registration will close on September 27, 2024. After September 27th, you will be able to register on-site (if space is available.) No Handouts will be available onsite. Handouts will be e-mailed out to participants 1 week in advance.
